Information

Euro Space Center, a promise of a space adventure to experience as a family

The **Euro Space Center** invites both children and adults to look up to the stars and take action. Located in the **province of Luxembourg**, along the E411, this theme park, unique in Europe, is entirely dedicated to **space exploration**. Here, the dream becomes a real experience: for a day, you step into the role of an astronaut and embark on a mission through an immersive, educational and truly playful journey. One question arises as soon as you arrive: *do you have what it takes to be an astronaut?*

Designed for families and accessible from **110 cm**, the **Spationaut Day** offers a complete adventure, punctuated by **TI interactive activities**, where scientific curiosity blends with thrilling sensations and team spirit.

Test yourself like a real astronaut

Everything begins in the **Space Hub**, where your abilities are put to the test. Agility, logic, precision, memory, visual acuity these challenges, developed in partnership with ESA, immediately immerse visitors in the atmosphere. You observe, reflect and compare results, always in a stimulating and supportive environment. Everyone finds their place, whatever their age or profile.

Then comes the physical training. This moment is often awaited with a mix of excitement and apprehension: the **Space Rotor**. This impressive centrifuge simulates the acceleration of a launch. At **3G**, the body is pressed against the walls, the heart races, and for a few seconds you understand what astronauts feel at the moment of liftoff.

Walk on the Moon, explore Mars

The journey continues with a striking experience: discovering **lunar and Martian gravity**. Thanks to the **Moon Walk** and **Mars Walk XP** simulators, equipped with augmented reality, the body becomes light, almost floating. Every step is surprising, every movement amusing. The immersion is complete, and the smiles say it all.

The adventure continues aboard the **Space Flight Unit**, a dynamic flight simulator that takes you on a reconnaissance mission over the spectacular landscapes of Mars. Then, once landed on the red planet, it is time for exploration in the **Mars Village**. How do you install a base? How do you pilot a rover remotely? Visitors discover, test and learn while having fun.

LUNAR·X, a futuristic mission to experience as a team

The major new attraction marks one of the highlights of the day: **LUNAR·X**. This immersive lunar mission propels participants into a futuristic capsule. After choosing a role – life-support officer, robotics engineer, geologist – everyone takes part in a collective adventure inspired by real-life situations.

Oxygen failure, signal loss, critical decisions to make everything depends on **cooperation**, in a tense yet exhilarating atmosphere. This experience strengthens team spirit and leaves a lasting memory, both through its intensity and the quality of its immersion.

A scientific, joyful and memorable adventure

At the Euro Space Center, science is experienced with a smile. **Sensations, wonder** and **discovery** follow one another naturally, without ever losing sight of the educational dimension. Parents and children share the same challenges and emotions, leaving with the feeling of having experienced far more than a simple visit.

Car park

Coach park
15 parking spots

Maestro

Opening times

All year round: weekends, public holidays and Belgian school holidays from 9.00 to 16.00 (last entry) • Closed on 24, 25, 31/12 and 1/01.

Price

adults €36 • 60+ €34 • children €32 • Free for children under 110 cm • Online booking preferred (€2 discount if you book online no later than 2 days before your visit)

Guided tour

Audio guide (EN, FR, NL, DE)

Tour length

Indoors: 6 hrs • Outdoors: 2 hrs • Audio guide (EN, FR, NL, DE)

Group

Price (min. 20 people) €17.50 or Astronaut Day from €29 per person

Guided tour EN, FR, NL, DE

More information • Space Adventure Camps for youngsters (6-18 years) during school holidays: Astronaut, Astronomy, Rockets, Satellites, Drones, Robotics, Astronauts & gliders, 3d-Modelling, Telecom • Orion & Discovery Mission • Accommodation • Voyager Café (150 covers) • Astronaut shop.
